MOSTY BROTHERS NURSERIES

With pleasure we desire to thank all our customers of the past for their patronage and good will, which has made us successful during more than 46 years in Kerr County. We feel that we need no introduction to the people of the Hill Country of Texas.

During the last three decades, we have made a specialty of growing the newest and choicest evergreens, ornamental trees, shrubs and everything for the beautifying of the home grounds, public buildings, parks, etc. We have the most complete assortment of choice and scarce evergreens growing in Texas. We have a stock of more than 500,000 evergreens in more than 100 varieties; thousands of roses and fruit trees suitable to our soil and climate.

The favorable soil rich in minerals; climatic conditions, due to our altitude and dry atmosphere, make our evergreens and all plants, etc., much hardier than those grown in a warmer and more humid climate. Time-tested policies and methods and the wealth of individual accumulated experience, gathered during more than 46 years of successful operation in Southwest Texas, combine to enable us to offer our products in full confidence to both professional and amateur alike.

The difference in cost between good evergreens, trees, etc., and poor ones is slight yet once they are planted. the character of the landscape and orchard is fixed, neither fertility of soil, water, care or expense can lift it to the level which original quality would have made possible. A sickly blooming rose or shy bearing tree, a thin branched, poor specimen evergreen is but a living disappointment. The buyer must rely upon the professional knowledge and experience of the men operating the nursery.

"As the planting, so shall the harvest be."

TERMS CASH on or before delivery payable at Kerrville, Texas, or Center Point, Texas.

INSPECTION CERTIFICATE of health from the state will be on every shipment. All stock is native grown and adapted to our soil and climate.

OUR LANDSCAPE SERVICE

There never was a true home without a garden. The green plant growing in an ash can in city tenement, the wan bloom so tenderly reared in the shadowed prison cell, the fountained and terraced estates of kings, all express alike our human need for the companionship of nature.

Our landscape service will solve your problem quickly, correctly and even more economically. The amount you spend is of less importance than what you plant and where you plant it. For instance, \$75.00 worth of evergreens, trees, etc., properly selected and correctly placed about your grounds will produce effects you may not be able to equal, although you spend several times that amount; and using plants adapted to the purpose will increase in value and beauty with age. For the average planting, we will be glad to advise you in laying out and planning your grounds in a pleasing way. For this service, we make no charge if we furnish the planting material.

We maintain the services of competent landscape architects. These men all have college degrees in their profession, plus years of practical experience. Some of them have had experience with the National Park Service, as well as having been employed on landscape projects for public institutions. These men are capable of

preparing preliminary sketches and final drawings in the form of blue prints, which may be accompanied by specifications and planting instructions. These drawings show the proper grades for lawns and terraces, proper lay-out and construction of walks, drives, pools, sprinkler systems, gardens and other features in the project. The planting plans show the name, grade and location of each shrub or tree, together with planting instructions where necessary. All minute details requisite to a landscape project of the very highest order will be handled by our landscape department for you. Consultation with one of our landscape architects costs you nothing and incurs no obligation on your part. Write or call us.

Soil analysis, tree surgery, and scientific feeding.

Complete landscape service, experienced men, modern tools and equipment.

Rearrangement of your present plantings, sodding, remodeling and making a modern landscape, all at very reasonable costs.

With our natural advantages, the use of only high class labor, under our personal direction, in the growing, grafting, pruning, cultivating and last, the digging and packing, we are prepared to supply the very best that money can buy.

Orders given us will receive our personal attention in selection, digging, packing and handling.

We respectfully solicit your business.

Yours truly,

MOSTY BROTHERS

ORDER EARLY—While we have a more complete stock than for several years past, it will be to your advantage to order early. Chances of success are much better when planting is done at the right time. We cannot come to solicit orders from everyone, and ask that you will write or call personally.

Uniform Replacement Agreement

Adopted by Texas Association of Nurserymen

Provided account is paid in accordance with Government credit rules and plants receive reasonable care, we will replace at one-half price of the plants, plus cost of labor, plants planted in the Spring, that fail to survive the following Summer, or, if planted in the Fall, fail to leaf out the following Spring.

Should we not have the same plants in stock, we reserve the right to give credit for an amount equal to one-half the cost of the plants lost, in other plants of your selection.

The above does not cover plants purchased on the nursery grounds and not planted by us.

SEEDS

We have vegetable seed for the garden, and flower seed suitable to our soil and climatic conditions. All seed are fresh and selected varieties that many years of successful market gardening have proved successful with us. All seeds at regular popular prices.

VEGETABLE PLANTS

We grow our own vegetable plants and always have a complete stock during the planting season here. Varieties are selected that have proved successful after years of testing in our fields. All seed are treated and seed beds are maintained free from harmful insects and soil diseases which are many times transmitted to your own garden. Insects and diseases not only cause failure of the present crop, but oftentimes remain in your garden soil indefinitely.

BEDDING PLANTS

At the proper season for planting out in the garden, we grow and maintain a complete stock of all varieties of bedding plants best adapted to our soil and climate. We select the seed and propagate these plants at our greenhouses near Kerrville. Most all plants are grown in small pots which makes transplanting much safer.

POT PLANTS

At all times we have a complete stock of greenhouse pot plants in full flower, also ferns, ivy, etc. These pot plants are suitable for the sick room, birthday gifts, remembrances, etc. They will be nicely and attractively wrapped. On these, we make free delivery in Kerrville, the Veterans Hospital at Legion, and all hospitals and sanatoriums in and near Kerrville. If you live out of town, we will pack for shipment by bus, express, or mail car. All pot plants are at reasonable prices.

CUT FLOWERS

We have the best and most modern equipped flower shop anywhere in this part of Texas. We always have a complete stock of choice cut flowers all the year around. We have the land, water, and facilities for growing many varieties of flowers which are cut fresh daily. Express your love, sympathy, congratulations, greetings, friendship, etc., with flowers. When words fail you, "Say It With Flowers." We make free delivery in Kerrville, Veterans Hospital at Legion, and to all hospitals and sanatoriums in and near Kerrville. For out of town delivery, we pack for shipment by mail car, bus or express.

FLORAL DESIGNS

Floral designs for all occasions—weddings, corsages, funerals, etc. Designing is done by trained artists in their line of work. All pieces are carefully designed and correctly arranged with choice flowers and fine materials. Free delivery in Kerrville. For out of town delivery, we pack for shipment by bus to all near-by towns.

FLOWERS BY WIRE

We are members of the Florists' Telegraph Delivery Association. Flowers are sent by wire all over the world through our membership in this organization. You pay for the flowers plus the cost of the telegram or telephone call, or with the allowance of ample time, your order can be sent by mail, in which case there is no additional cost other than the cost of flowers. The flowers with a card bearing your message will be delivered immediately by the florist nearest the person to receive the flowers from you.

PHONE OR WRITE US

Call us, Phone 502, Kerrville, or write us for your flowers, and we will do all possible to have your orders filled and delivered just as you would have them delivered.

VISIT WITH US

Our flower shop and greenhouse and retail nursery sales department are located at our new office building on the San Antonio Highway, just east of Kerrville, between town and the Veterans Hospital at Legion. About one mile east of town.

"Say it with Flowers"

BROADLEAVED EVERGREENS

EVERGREEN DEPARTMENT

All plants in this department are priced balled and burlapped (balled in earth) unless otherwise noted, F. O. B. nursery.

ABELIA GLOSSY (*A. Grandiflora*) B&B

Flowers white, flushed lilac pink. Blooms profusely and continuously from May to frost. Foliage glossy green, turning to a glossy bronze-green during the winter. This is one of our very best plants for foundation work, massing and grouping, and a most beautiful hedge plant. Also a very handsome specimen plant. Very hardy. Comes from China.

15 to 18 inches high, each	\$1.00
18 to 24 inches high, each	1.25
24 to 30 inches high, each	1.50
30 to 36 inches high, each	2.00
3 to 4 feet high, each	2.50
Larger specimen plants	\$3.00 and up

AGARITA (*Berberis Trifoliata*) B&B

Well known native evergreen producing fruit which is used for jellies.

18 to 24 inches, each	\$1.50
2 to 3 feet, each	2.00

AUCUBA—Gold Dust Plant—See page 8.

BARBADO CHERRY (*Malpigia Glabra*) B&B

Small shrub, pointed light green leaves. Small pink flowers in produsion, followed by bright red berries. Evergreen from San Antonio south. A native of South Texas.

15 to 18 inches, each	\$1.00
18 to 24 inches, each	1.50

RED LEAF BARBERRY (*Berberis Atropurpurea*) B&B

Comparatively low growing shrub, thorny, deciduous. Leaves deep red in summer. An excellent shrub for summer color effect.

15 to 18 inches, each	\$1.25
18 to 24 inches, each	1.50
Larger sizes, each	\$2.00 and up

BUTTERFLY BUSH (*Buddleia*) B&B

We have the improved varieties, Hartwegi, Lindley, etc. Well known, hardy, flowering shrub. Blooms profusely. Bright purple colored spikes. Very fragrant. Plant in full sunshine. From Japan.

Plants from gallon cans, each	\$1.00
Larger sizes, each	1.50

BOXWOOD PRICES:

8 to 10 inches high, each	\$1.00
10 to 15 inches high, each	2.00

DWARF JAPAN BOX (*Buxus Samperviens Japonica*) B&B

Extremely slow, very compact. Good for shaded locations.

ENGLISH BOX (*Buxus Sempervirens*) B&B

Smaller leaves and slower growth than above. Darker green.

CAPE JASMINE PRICES:

12 to 18 inches high, each	-----\$1.25
18 to 24 inches high, each	-----1.50
24 to 36 inches high, each	-----2.00
Larger specimen plants, each	-----\$3.00 and up

CAPE JASMINE (*gardenia floridus*) B&B

Double waxlike flowers, exquisitely fragrant. Dark glossy leaves. Low shrubs. If they turn yellow work two pounds coperas and one-fourth pound sulphate of amonium in the soil around each plant. Peat moss is very beneficial. From China.

EVER-BLOOMING CAPE JASMINE (*gardenia fortunei*) B&B

Same as above except blooms all summer and fall.

CAPE JASMINE DWARF (*Gardenia Radicans Veitchii*)

Very small dwarf evergreen. Pure white, very fragrant flowers. Must have an acid soil such as Cape Jasmines require.

Plants in gallon cans, each	-----\$1.00
-----------------------------	-------------

CYDONIA—See Flowering Quince, page 7.**CENIZA (*leucophyllum* or purple sage) B&B**

Purplish pink flowers. Ashy gray leaves. Native to southwest Texas. Very hardy. Planted extensively on roadside plantings by Texas Highway Department. Stands adobe and alkaline soils perfectly. The word "ceniza" is the Spanish word for ashes. Sometimes erroneously spelled "senesa."

Gallon cans, each	-----\$1.00
18 to 24 inches high, each	-----1.25
24 to 30 inches high, each	-----1.50
30 to 36 inches high, each	-----2.00
3 to 4 feet high, each	-----2.50
Larger specimen plants, each	-----\$5.00 and up

COTONEASTER PRICES:

18 to 24 inches high, each	-----\$1.50
2 to 3 feet high, each	-----2.00
3 to 4 feet high, each	-----3.00
Larger specimen plants, each	-----\$4.00 and up

COTONEASTER FRANCHET (*C. Franchieti*) B&B

Medium tall graceful branching habit; flowers white; berries, rose red. The hardiest variety we have. Comes from China.

COTONEASTER SILVER LEAF (*C. panosa*) B&B

Small white flowers followed by clusters of scarlet berries in Winter. Leaves ashy color on under sides, giving plant a soft, grayish color effect. Graceful habit.

COTONEASTER PARNAY (*c. parneyi*) B&B

Larger dark green heavy foliage. Very desirable.

COTONEASTER ROCK (*C. Horizontalis*) B&B

Very low, slow grower. Quite small leaves. White flowers followed by small red berries. Desirable for rock gardens.

ELEAGNUS PRICES:

18 to 24 inches high, each	\$1.50
2 to 3 feet high, each	2.00
3 to 4 feet high, each	3.00
Larger specimen plants, each	\$4.00 and up

ELEAGNUS FRUITLAND (E. Fruitlandi) B&B

Stocky, spreading shrub. Slightly spiny. Leaves green, dotted with silver scales on upper sides and silvery beneath. Very hardy. Small flowers. Very fragrant. From China.

ELEAGNUS SIMON (pungens simoni) B&B

Smaller leaves and slower grower than Fruitlandi. From Japan.

ELEAGNUS BROADLEAF (E. Marcophylla) B&B

Larger leaves, faster grower, very hardy. From China.

EUONYMUS GOLDSPOT (E. aurea variegata) B&B

Compact upright growth. Shiny green leaves with bright golden markings. Very attractive and hardy.

15 to 18 inches high, each	\$1.00
18 to 24 inches high, each	1.50
2 to 3 feet high, each	2.00

EUONYMUS JAPAN (e. japonica) B&B

Green glossy leaves, upright grower. Will cling against walls, chimneys, etc. May be sheared to any form. One of our most popular, hardy evergreens. Makes a most beautiful low, compact hedge where a more elaborate effect is desired. From Japan.

18 to 24 inches high, each	\$1.00
24 to 30 inches high, each	1.50
30 to 36 inches high, each	2.00
3 to 4 feet high, each	2.50
4 to 5 feet high, each	3.50
18 to 24 inch Bare Roots, for hedges, per doz.	6.00
18 to 24 inch Bare Roots, for hedges, per 100	40.00

EUONYMUS RED LEAF (E. Radicans colorata) B&B

A trailing variety which has highly colored foliage during the Fall and Winter.

18 to 24 inches spread, each	\$1.00
------------------------------	--------

FEIJOA SELLOWIANA (Pineapple Guava) B&B

Silvery green leaves; spreading habit; flowers, white waxy petals, purple crimson centers. Fruit delicious, mingling flavor of pineapple, raspberry, and banana; imparts a very pleasing fragrance in a room or trunk. From South America.

18 to 24 inches high, each	\$1.50
2 to 3 feet high, each	2.00
3 to 4 feet high, each	3.00
Heavy specimens, each	\$4.00 and up

FLOWERING QUINCE (cydonia Japonica) B&B

Brilliant scarlet flowers very early in the spring. Not an evergreen. Grafted plants true to color. From Persia.

18 to 24 inches high, each	\$1.50
2 to 3 feet high, each	2.00
3 to 4 feet high, each	3.00

FIRETHORN—See *Pyracantha*, page 12.

GARDENIA—See *Cape Jasmine*, page 6.

GOLDFLOWER—See *Hypericum*, page 9.

GUAVA—See *Feijoa*, page 7.

GOLD DUST PLANT (Aucuba Variegata) B&B

Very attractive large leaves highly colored with gold. Must be planted in the shade of a building, north exposure preferred. Very slow grower.

From 10 inch pots, each-----\$2.00
From 12 inch pots, each-----3.00

HOLLY BURFORD (Ilex Bufordi) B&B

By far the most beautiful of all hollies. Beautiful, dark, glossy green leaves, slightly spiny. The berries are large and heavy and of a beautiful brilliant red. Very slow grower.

15 to 18 inches high, each-----\$2.00
18 to 24 inches high, each-----2.50
24 to 30 inches high, each-----3.00
Larger sizes, each-----\$5.00 and up

HOLLY CHINESE (Ilex Cornuta) B&B

Upright grower, leaves very full of spines. Bright red berries. Very desirable in foundation plantings and makes a beautiful specimen. The best holly for black soil.

18 to 24 inches high, each-----\$2.00
2 to 3 feet high, each-----3.00
Larger sizes, each-----\$4.00 and up

HOLLY DAHOON (Ilex Cassine) B&B

Upright grower. Narrow olive-green leaves three inches long. Bears red berries profusely. Very attractive. Same grades and prices as Chinese Holly.

HOLLY YAUPON (Ilex Vomitoria) B&B

Shrub with low spreading branches. Small dark green leaves. Small white flowers, followed by scarlet red berries in Winter. Native of central and east Texas.

18 to 24 inches high, each-----\$1.25
24 to 30 inches high, each-----1.50
30 to 36 inches high, each-----2.00
3 to 4 feet high, each-----3.00

PRIDE OF HOUSTON YAUPON HOLLY

Berry bearing variety. Cutting grown.

18 to 24 inches high, each-----\$2.00
2 to 3 feet high, each-----3.00
Larger sizes, each-----\$4.00 and up

HONEYSUCKLE PINKGLOW (Lonicera Heckrotti) B&B

Evergreen bush honeysuckle. Everblooming. Flowers cream inside, bright pink outside. Very attractive and popular. Very hardy, stands alkali soils, heat and cold.

Plants in gallon cans, each-----\$1.00
2 to 3 feet high, each-----1.50

HONEYSUCKLE ORANGEFLAME (Lonicera Belgica) B&B

Low growing, everblooming evergreen shrub. Flowers gold inside and red before opening. Similar to above except habit of growth.

Same grades and prices as Pinkglow.

HONEYSUCKLE VINES—See page 24.**HEDGES—See page 19.**

HYPERICUM MOSTY GOLDEN GLOW (Goldflower) B&B

Low spreading evergreen shrub, light green compact foliage. Blooms profusely, large yellow flowers. Highly tolerant of alkaline soils. Excellent for low groups and massing. Without question, the most beautiful and popular low-growing, dwarf, flowering, broadleaf evergreen. No planting complete without this plant. Our own introduction.

15 to 18 inches high, each	\$1.25
18 to 24 inches high, each	1.50
24 to 30 inches high, each	2.00
Larger sizes, each	\$3.00 and up

ILEX—See Holly, page 8.

JASMINE PRICES:

18 inch spread, each	\$1.00
2 foot spread, each	1.50
3 foot spread, each	2.00
Larger specimens, each	\$3.00 and up

ITALIAN JASMINE (Jasmiuum Floridum) B&B

Rich dark green foliage, bright yellow star-shaped flowers in profusion all summer and fall. Strong and vigorous. Very fine for low massing and used for base planting around tall plants or groups. Very hardy. Will thrive in all soil, including alkaline and limey soils. Stands shade or sunshine. Our finest low-growing, flowering evergreen. From Asia.

PRIMROSE JASMINE (J. Primulinum) B&B

Larger leaves and faster grower than Floridum though not as hardy. Blooms in late **Winter**.

UPRIGHT JASMINE (Jasmine Revolutum) B&B

Tall, upright, robust grower.

JAPONICA—See Flowering Quince, page 7.

JAPONICA—See Euonymus, page 7.

LAUREL ENGLISH (Laurocerasus officinalis) B&B

A fine shrub with broad shiny leaves. Slow grower. From southeast Europe to North Persia.

18 to 24 inches high, each	\$1.50
2 to 3 feet high, each	2.00
Larger specimen plants, each	\$3.00 and up

LAUREL SOUTHERN CHERRY (laurocerasus caroliniana) B&B

Pyramidal upright grower, forming a tall pointed, towering effect. Firm, dark green leaves. Small fragrant flowers early in Spring, followed by greenish-black fruit. Our best broad-leaved evergreen for high points. Very hardy. Native from North Carolina to Texas.

2 to 3 feet high, each	\$1.50
3 to 4 feet high, each	2.00
4 to 5 feet high, each	3.00
Larger specimen plants, each	\$4.00 and up

LIGUSTRUM BUSHY (*Ligustrum Japonica*) B&B

Glossy, green foliage, white flowers in June followed by blue berries. Vigorous and fast grower. Used for heavy planting, screens, and wind-breaks. Hardy. Makes a permanent hedge and may be sheared same as privet.

	Each	Dozen
2 to 3 feet high, B&B-----	\$1.00	\$10.00
3 to 4 feet high, B&B-----	1.25	12.50
4 to 5 feet high, B&B-----	1.50	15.00
5 to 6 feet high, B&B-----	2.50	25.00
Heavy specimen plants, B&B, each-----	\$4.00 and up	

For HEDGES, see page 19.

LIGUSTRUM TREES—See page 27.

LEUCOPHYLLUM—See Ceniza, page 6.

LUCIDUMS (Spreading Varieties)**LUCIDUM WAX (Compact Wax Lucidum) B&B**

One of the handsomest and most popular broad-leaved evergreens grown. Medium grower, compact, graceful habit; large glossy green leaves. White flowers in June. Valuable for heavy massing or grouping, foundation work, or as a single specimen. Also makes a most beautiful hedge.

15 to 18 inches spread, each-----	\$1.00
18 to 24 inches spread, each-----	1.25
24 to 30 inches spread, each-----	1.50
30 to 36 inches spread, each-----	2.00
3 to 4 feet spread, each-----	3.00

LUCIDUMS (Upright Varieties)**LUCIDUM CRINKLY LEAF (*L. repadens*) B&B**

Upright growth. Dark green pointed leaves. Heavy foliage set close together on branches.

2 to 3 feet high, each-----	\$2.00
3 to 4 feet high, each-----	2.50
Larger specimen plants, each-----	\$4.00 and up

LUCIDUM UPRIGHT (*ligustrum gracillis*) B&B

Dark glossy, green leaves. Compact growth. White flowers in June. Very desirable for high places in foundation planting or groups. Hardy.

Same grades and prices as Crinkly Leaf Lucidum.

LUCIDUM BOX (*Henryii*) B&B

Small leaves, very glossy, light green. Compact grower. Shears easily. Used as a substitute for Boxwood when sheared.

15 to 18 inches, sheared specimens-----	\$1.50
18 to 24 inches, sheared specimens-----	2.00
24 to 30 inches, sheared specimens-----	3.00

PRIVET AMOOR RIVER (*Ligustrum Chinensis*) B&B

Natural grown plants, not sheared.	Each	Dozen
2 to 3 feet high-----	\$0.75	\$ 7.50
3 to 4 feet high-----	1.00	10.00
Larger sides, each-----	\$2.00 and up	

For HEDGES, see bare-root prices, page 19.

LOQUAT (*eribotrya Japonica*) B&B

Large handsome leaves; sturdy, vigorous grower; somewhat spreading. Very attractive. From South Asia.

18 to 24 inches high, each-----	\$1.50
24 to 30 inches high, each-----	2.00
30 to 36 inches high, each-----	2.50
Larger specimen plants-----	\$3.50 and up

LIVE OAKS—See page 27.

MAGNOLIA (m. Grandiflora) B&B

Well known evergreen. Large, glossy, green leaves. Sturdy upright, spreading grower. We have the tree form and bush form. Very attractive as specimen or grouping. Hardy as far north as Kansas. Native of North Carolina to Texas.

2 to 3 feet high, each	\$3.00
3 to 4 feet high, each	4.00
4 to 5 feet high, each	5.00
5 to 6 feet high, each	6.00
Larger specimen plants, each	\$7.50 and up

MAGNOLIA CHINESE (M. Liliflora) B&B

A deciduous Magnolia. Very large, tulip-shaped flowers, purple outside and purplish-pink inside. Blooms very early before leaves appear. From China.

2 to 3 feet high, each	\$3.00
------------------------	--------

MAGNOLIA CHINESE (Soulangena) B&B

Same as Liliflora except flowers are pink outside and white inside. From China.

Same grades and prices as Liliflora.

MALPHIGIA Glabra (Barbado Cherry)—See page 5.**MYRTLE PRICES:**

Plants from gallon cans, each	\$1.00
Larger field grown plants, each	\$1.50 and up

ROMAN MYRTLE (Myrtus communis) B&B

Small, shiny, green leaves. Very aromatic. White flowers and black berries. Graceful, medium grower. Does not stand hard freezing, but soon grows out again.

COMPACT ROMAN MYRTLE (M. microphylla compact) B&B

Same as Roman Myrtle except smaller leaves and more compact grower. From the Mediterranean region.

SWEET MYRTLE (M. microphylla) B&B

Small leaves and slower grower than Roman Myrtle. Otherwise the same.

NANDINA (N. domestica) B&B

Beautiful upright grower. The delicate foliage is red when young, dark green when mature, assuming beautiful coppery bronze to fiery red tones in winter; also, covered with bright red berries. Assumes brighter color if planted in sunny location. Very desirable for bright colors in any planting. Much used in foundation work, under windows, etc. Makes most attractive hedge. Also beautiful specimens. Very hardy. From China and Japan.

15 to 18 inches high, medium, each	\$1.00
18 to 24 inches high, medium, each	1.25
2 to 3 feet high, medium, each	1.50
15 to 18 inches high, heavy, each	1.25
18 to 24 inches high, heavy, each	1.50
24 to 30 inches high, heavy, each	2.00
30 to 36 inches high, heavy, each	2.50
Larger specimen plants, each	\$3.00 and up

For extra heavy specimen plants, add 50% to above prices on each heavy grade as listed.

OLEANDER (Nerium) B&B

Well known flowering shrub. Very attractive.

2 to 3 feet high, in cans, each	\$1.50
---------------------------------	--------

PHOTINIA (P. dentata and Serrulata) B&B

Handsome strong growing upright sturdy shrub. Large glossy leaves, slightly spiny, and somewhat crinkled edges. Young growth colors highly early in the spring and late Fall. Very attractive when mixed in other evergreens. Large heads of pure white flowers in the Spring.

18 to 24 inches high, each	\$1.50
24 to 30 inches high, each	2.00
30 to 36 inches high, each	2.50
3 to 4 feet high, each	3.50
Larger plants, each	\$4.50 and up

PITTOSPORUM (P. tobira) B&B

Dense globular shrub, dark glossy green leaves, small white flowers, resembling orange blossoms. Will not stand freezing. Hardy at San Antonio and south.

15 to 18 inches, each	\$1.50
18 to 24 inches, each	2.00
2 to 3 feet, each	2.50
Larger plants, each	\$3.50 and up

PITTOSPORUM SILVER (P. tobira manginatum) B&B

Same as above except leaves are marked with bright silver spots. Very attractive. From Japan.

Plants from 6 inch pots, each	\$1.00
Plants from 10 inch pots, each	1.50

PRIVET HERGES—See page 19.**PYRACANTHA PRICES:**

Plants from gallon cans, each	\$1.00
Plants from 5 quart cans, each	1.25
Plants from 8 inch pots, each	1.50
Plants from 10 inch pots, each	2.00
Field grown, 3 to 4 feet high, each	2.50

PYRACANTHA LALANDI (Firethorn) B&B

Upright strong grower. White flower in Spring, followed by bright orange berries during the Winter. The Pyracantha is identical with Hawthornes, except they are evergreens. Small dark green leaves. Plants are very thorny and should be planted where they have plenty of room. Much more satisfactory than the hollies and give the same effect with the blooms and berries. This is the hardiest variety of the Pyracanthas. From southeast Europe to South Asia.

PYRACANTHA YUNNANENSIS (Firethorn) B&B

Vigorous robust spreading grower. White flowers followed by scarlet red berries in the Fall and Winter.

UPRIGHT RED BERRY PYRACANTHA B&B

Same as above except more upright grower. All Pyracanthas are very desirable for bird sanctuaries.

POMEGRANITE Dwarf (Punica Granatun Nana) B&B

Very small compact plants with bright red flowers. Evergreen from San Antonio south. From India.

Plants from gallon cans, each	\$1.00
-------------------------------	--------

QUINCE FLOWERING—See Flowering Quince, page 7.**RED WING (Heteropteris Speciosa) B&B**

A rare plant from South America. Yellow flowers with red seed pods that cling to the stem, a profusion of color the entire season, regardless of heat and dry weather. A small shrub, and may be trimmed without affecting its beauty. Also, a good cut flower.

Plants in gallon cans, each	\$1.00
2 to 3 feet, each	1.50
Larger sizes, each	\$2.00 and up

RETAMA (Parkinsonia Aculeata)

Five quart cans, each-----\$1.50

SENEA—See Ceniza, page 6.

SWEETPEA EVERGREEN (Lathrus Latifolia) B&B

A low trailing evergreen, flowered red, pink, and white. Very hardy, will stand low temperatures, heat and alkalin soils. A most attractive and useful evergreen and should be used more extensively.

18 to 24 inches spread, each-----\$1.00

VIBURNUM PRICES:

18 to 24 inches high, each-----\$1.50

24 to 30 inches high, each-----2.50

Larger plants, each-----\$3.50 and up

SWEET VIBURNUM (V. odoratissima) B&B

Stout upright bushy shrub, shiny leaves, white flowers. Thick, glossy, dark green, large leaves. Very attractive. Comes to us from India.

VIBURNUM SUSPENSUM (V. Sandankwa) B&B

Large leaves and more spreading than most viburnums. Leaves somewhat wrinkled, flowers cream colored and fragrant, followed by red berries. Stands shade and is hardy from San Antonio south. Comes from China.

VIBURNUM TINUS (Laurustinus) B&B

Winter blooming evergreen shrub. Flesh-colored flowers. Upright grower. Will not stand zero weather. Comes from the Mediterranean region.

TUNG-CHING TREE (Xylosma Myroxylon Senticosa) B&B

New. Dark lustrous leaves. Good grower. Yellow fragrant flowers in August and September. Very rare.

30 to 36 inches high, each-----\$3.00

Larger sizes, each-----\$4.00 and up

CONIFER EVERGREENS

ARBORVITAE

(Dwarf Varieties)

GLOBE ARBORVITAE PRICES:

12 to 15 inches high, each-----\$1.00

15 to 18 inches high, each-----1.25

18 to 24 inches high, each-----1.50

24 to 30 inches high, each-----2.00

Larger specimen plants, each-----\$3.00 and up

DWARF GLOBE ARBORVITAE (thuja orientalis bonita) B&B

Very slow compact grower, globe shaped, dark green color. Very desirable for urn, pedestal, etc.

DWARF GOLDEN GLOBE (T. O. Aurea Globosa Nana) B&B

Almost identical as Dwarf Globe, except bright golden color. One of the newer varieties.

DWARF GOLDEN ARBORVITAE (Berckmans Dwarf Golden) B&B

Dwarf compact grower, very symmetrical. Tips of all branches assume bright golden tints; used extensively for grouping in front of the taller specimens; very hardy; retains beauty with age. Most popular arborvitae.

15 to 18 inches high, each	\$1.00
18 to 24 inches high, each	1.25
24 to 30 inches high, each	1.50
30 to 36 inches high, each	2.00
3 to 4 feet high, each	2.50
Larger specimen plants, each	\$3.00 and up

BLUE GREEN ARBORVITAE (T. O. glauca compacta) B&B

Compact grower, fresh blue-green color. Very desirable for color effects in Conifer groups.

18 to 24 inches high, each	\$0.75
24 to 30 inches high, each	1.00
30 to 36 inches high, each	1.50
Larger specimen plants, each	\$2.00 and up

ROSEDALE — B&B

Bluish green color, turning to autumn colors in winter. A hybrid arborvitae.

Same grades and prices as Blue Green Arborvitae.

(Tall Growing Varieties)

PYRAMIDAL ARBORVITAE PRICES:

2 to 3 feet high, each	\$1.00
3 to 4 feet high, each	\$1.50
4 to 5 feet high, each	2.50
5 to 6 feet high, each	3.50
Larger specimen plants, each	\$4.50 and up

GOLDSPIRE ARBORVITAE (T. O. aurea conspicua) B&B

Upright pyramidal grower. Foliage tinted with bright color, changing to rich coppery autumn colors in winter. Can be used in any location where bright color is desired. Very attractive and rare.

EXCELSA PYRAMIDAL (T. O. Excelsa) B&B

Tall upright pyramidal, compact grower. Dark green foliage. One of the best for a location desiring a tall pointed, formal plant. Very desirable as single specimen or used in center of conifer groups. Remains very compact and attractive with age. Our best and most popular pyramidal conifer. Does not turn yellow in alkaline soils.

BAKERS PYRAMIDAL (T. O. Bakerii) B&B

Similar to Excelsa, except a lighter green color. Well known standard variety.

BLUESPIRE PYRAMIDAL (T. O. Howardii) B&B

An improved type of the Baker. Slight bluish cast in color. A very clean type, stands up well with age. Holds good color in alkaline soils. Very desirable.

RAMSEY HYBRID (T. O. Ramseyii) B&B

Dark green, almost feathery foliage. Tall, very slender type which develops into a nice specimen with age. Very hardy. Sometimes used in place of Italian Cypress in colder climates.

SIKES COLUMNAR (T. O. Columnaris) B&B

Very slender column type becoming real specimens with age. A clean, very hardy, beautiful plant becoming very popular. The most slender of the Arborvitaes. Very graceful.

CHINESE SEEDLING ARBORVITAE (T. O. Seedling) B&B

Tall spreading, fast grower. Used for windbreaks, screens, etc. Very hardy in any location.

	Each	Dozen	Per 100
3 to 4 feet high-----	\$1.00	\$10.00	\$ 75.00
4 to 5 feet high-----	1.50	15.00	100.00
5 to 6 feet high-----	2.00	20.00	150.00
Heavier plants, each-----		\$3.50 and up	

CEDARS AND CYPRESSES**DEODAR CEDAR (cedrus deodara) B&B**

Cedar of the Himalyan Mountains, often called spruce and fir trees. Towering pyramidal form, growing from broad base at ground to point at tip. Horizontal branches, graceful beautiful, silver-green foliage. Very fine for specimen planting. Adds grace and beauty to the finest grounds. Our most beautiful tree.

2 to 3 feet high, each-----	\$3.50
3 to 4 feet high, each-----	5.00
4 to 5 feet high, each-----	6.00
5 to 6 feet high, each-----	7.50
Larger specimen trees, each-----	\$10.00 and up

ITALIAN CYPRESS (cupressus arizonica) B&B

Very tall tree, having a pillar or column effect. Its dark green shaft rising over other evergreens gives a varied skyline. Used equally well on small yards and homes, as well as larger ones. Used at entrances, corners, porch columns, and as single specimen with dwarf spreading Junipers around base, makes a most beautiful group. Our plants are all cutting grown from specimen stock which will remain true to type so essential in planting pairs at entrances, etc.

18 to 24 inches high, each-----	\$1.00
24 to 30 inches high, each-----	1.25
30 to 36 inches high, each-----	1.50

6 to 7 feet high, each-----	5.00
Larger specimen plants, each-----	\$7.50 and up

SILVERSPIRE, ROYAL ITALIAN, SILVERPLUME, SNOW WHITE PRICES:

3 to 4 feet high, each-----	\$3.00
4 to 5 feet high, each-----	4.00
5 to 6 feet high, each-----	5.00
6 to 7 feet high, each-----	6.00
Larger sizes, each-----	\$7.50 and up

ROYAL ITALIAN CYPRESS — B&B

These are grafted on special root stocks that are very hardy and also transplants much better than trees grown on own roots. This variety makes beautiful, uniform specimen trees.

MOSTY SILVERSPIRE ARIZONA CYPRESS — B&B

These are grafted plants. They transplant well and will make uniform specimens. One of the most beautiful, silvery Arizona Cypresses grown. Rather compact, narrow, pyramidal growth. A most desirable specimen that attracts attention in any landscape. Our own introduction.

SILVERPLUME ARIZONA CYPRESS — B&B

Another better variety with glowing silver-blue foliage. Graceful yet full and symmetrical. Grafted plants only.

MOSTY SNOW WHITE ARIZONA CYPRESS — B&B

Grafted plants only. This is by far the whitest colored foliage of any plant in our nursery. More spreading in growth than Silverspire and not as compact. Attracts attention above all other specimen plants in landscape and adored by everyone. Also, our own introduction.

JUNIPERS

(Trailing and Horizontal Varieties)**PFITZER JUNIPER (*J. pfitzeriana*) B&B**

Horizontal, graceful branches forming an immense, flat irregular head of bluish-green color. Very graceful in outline. Smooth foliage. The best and most popular dwarf juniper.

15 to 18 inch spread, each	\$1.00
18 to 24 inch spread, each	1.50
2 to 3 feet spread, each	2.00
Larger specimens, each	\$3.00 and up

(Dwarf Pyramidal Varieties)**GREEK JUNIPER (*J. excelsa stricta*) B&B**

Very slow, upright dwarf, compact conical shape. Foliage is compact, shiny green color. Very attractive.

18 to 24 inches high, each	\$1.50
24 to 30 inches high, each	2.00
Larger plants, each	\$3.50 and up

GOLDSPOT GREEK JUNIPER (*chinensis variagata*) B&B

Same as above except having bright golden markings on the foliage. Odd and attractive.

Same grades and prices as Greek Juniper.

DENSA GLAUCA (*J. Viridifolia*) B&B

Upright dense, compact, conical growth. Bluish-green, soft smooth foliage. A clean and most beautiful specimen. The very best of the slow growing, pyramidal type Juniper.

24 to 30 inches high, each	\$2.50
30 to 36 inches high, each	3.00
3 to 4 feet high, each	3.50
Larger specimen plants, each	\$4.50 and up

(Tall Pyramidal Varieties)**PRICES:**

3 to 4 feet high, each	\$3.00
4 to 5 feet high, each	4.00
5 to 6 feet high, each	5.00
Larger specimen plants, each	\$7.50 and up

BLUE COLUMN CHINESE JUNIPER (*J. Chinensis Columnaris Blue*) B&B

Quick growing, upright, pyramidal habit, beautiful, sparkling, blue-green color. Very hardy and vigorous in any soil. Becomes one of the finest specimens with age. Very desirable and will become one of the most popular Junipers for the South.

CHINESE SYLVESTER (J. Sylvestris femina) B&B

A unique pyramidal type adapted for southern plantings. Juvenile mixed with mature foliage gives the tree a two-tone color effect.

CONNART JUNIPER (J. Virginia Connorti) B&B

This variety is one of the leading favorites. It has deep, rich green, rather smooth, whipcord foliage. Unusually attractive.

DUNDEE JUNIPER (J. Virginiana Pyramidaformia Hilli) B&B

A beautiful, grayish-green in summer. Turns to a rich, purplish-plum color in autumn and winter, found in no other tree. A good grower and very hardy. A beautiful specimen in any planting.

(Colorado Silver Varieties)

The following are the most beautiful and attractive Junipers offered in Texas. They are well adapted to foundation plantings if kept sheared or trimmed, and to general landscape plantings. They are clean, hardy, to heat, cold, drought, adapted to most all soil conditions and are not troubled by insects and diseases. All plants offered are grafted and are true to form and color, and will develop into uniform specimens.

PRICES:

3 to 4 feet high, each	-----\$3.00
4 to 5 feet high, each	-----4.00
5 to 6 feet high, each	-----5.00
Larger specimen plants, each	-----\$7.50 and up

HILLS SILVER (J. Scopulorum Hilli) B&B

Broad, pyramidal and compact in growth. Light, rich blue color. Clean, smooth foliage. Makes a beautiful specimen which always attracts attention.

SILVER RADIANCE (J. Scopulorum Mostyii) B&B

An improved variety of the Hill Silver, being brighter in color especially during the winter. This variety was originated in our nursery near Kerrville.

SILVERGLOW (J. Scopulorum Silverglow) B&B

More narrow and upright in growth. A beautiful, shining, silver color at all seasons. Also has the same clean, smooth whipcord foliage of Hills Silver and Silver Radiance.

BLUE ALLIGATOR (J. Pachyphlaea) B&B

This is a hardy tree coming from Arizona. A brilliant silver-blue color, somewhat dwarf grower, broad at base.

COLORADO BLUE — B&B

A broad compact upright grower. Blue-green foliage. Grafted plants.

MOONLIGHT — B&B

Very graceful, silver color.

BURKI — B&B

Improved Silver Cedar, grafted.

GAREEI — B&B

From Oklahoma. A low spreading grower with heavy silver-blue foliage. Grafted.

RED CEDAR PRICES:

3 to 4 feet high, each	2.00
4 to 5 feet high, each	3.00
Larger specimen trees, each	\$4.00 and up

RED CEDAR (*juniper virginiana*) B&B

Well known trees. Tall with spreading branches. May be sheared to suit many locations. Very hardy.

RED CEDAR (*juniperus virginiana*) B&B

Same as above except sheared to pyramidal form.

TEXAS RED CEDAR (*Juniperus pinchoti*) B&B

More dwarf than Virginiana. Holds bright green color all through winter. This is our native Cedar. Plants sheared to pyramidal forms or natural growth.

FIR AND PINES

FIR CHINESE (*Cunninghamia Lanceolata*) B&B

Tall slender in growth. Foliage very spiny. This is a new and very rare specimen. Odd and very attractive.

2 to 3 feet high, each	\$3.00
3 to 4 feet high, each	4.00
Larger sizes, each	\$5.00 and up

PINE ALLEPO (*Pinus Halepensis*) B&B

A rapid growing pine, medium, long needles. Light green color. Suitable for black soils and dry climates. Not hardy in the colder parts of Texas. Comes from the Mediterranean region.

24 to 30 inches high, each	\$2.50
30 to 36 inches high, each	3.50
Larger sizes, each	\$5.00 and up

PINE ITALIAN STONE (*Pinus Pinea*) B&B

Makes a dense, broad, heavy cone-shaped tree, one of the most handsome pines grown. Comes from Italy.

Same grades and prices as Aleppo Pine.

PINE NUT (*Pinus Pinon*) B&B

A native of Southwest Texas and as far as Arizona. The pine the Indians gathered nuts from for eating. Very slow grower, extremely hardy and attractive.

24 to 30 inches high, each	\$3.00
30 to 36 inches high, each	4.00
Larger sizes, each	\$5.00 and up

DESERT AND SEMI-ARID PLANTS

CENTURY PLANTS, SOTOL, YUCCA, GRASSES

Used in planting on grounds where Spanish, desert, or arid effects are desired. On certain types of architecture and locations, a few of these may be used very sparingly. Varieties listed are all grown under our climatic conditions and will be found perfectly hardy.

CENTURY PLANT (*agave americana*) B&B

Very large, fleshy leaves. Large heads of flowers on large, tall stems, often 20 feet high.

Prices ----- \$1.50 and up

SOTOL (*dasyliiron texanum*) B&B

A native. Long slender, spike-tooth leaves, glossy green; prickles yellow; a strong grower.

2 to 3 feet high, each	\$1.50
3 to 4 feet high, each	2.00

RED YUCCA (Hesperaloe) B&B

A native variety with red flowers. Very attractive and continuous bloomer. Unexcelled for massing.

2 year	\$1.00
3 year, heavy clumps	1.50

SPANISH DAGGER (tree yucca; y. treculeana) B&B

Has large trunk like tree; large head or stiff bayonet leaves; white flowers borne on very large heads.

2 to 3 feet high, each	\$2.00
3 to 4 feet high, each	3.00
Larger sizes, each	\$5.00 and up

YUCCA GLAUCA, Radiosa — B&B

Same grades and prices as Sotol.

PAMPASS GRASS (cortaderia argentia) B&B

Well known grass with silvery white plumes.

Medium clumps, each	\$1.00
Larger clumps, each	\$2.00 and up

BASKET GRASS — B&B

Evergreen bunch grass, dark green, long round leaves. Very graceful. Indispensable in groups of native shrubs.

Same grades and prices as Sotol.

PALMS (Washington Filefera) B&B

Fast grower, large leaves. Leaves killed at low-freezing temperatures. The hardiest palm we grow.

3 to 4 feet high, each	\$3.50
Larger sizes, each	\$5.00 and up

HEDGE PLANTS

AMOR RIVER PRIVET (Ligustrum Sinense) N. B.

Best quick growing hedge. Small leaves. Graceful without shearing, or may be sheared to any size or form. Plant from 12 to 18 inches apart for hedges.

	Dozen	Per 100
Seedlings, 1 year	\$1.00	\$ 5.00
Branched, 18 to 24 inches high	1.50	7.50
Branched, 2 to 3 feet high	2.00	10.00
Branched, 3 to 4 feet high	2.50	15.00

JAPAN LIGUSTRUM (Ligustrum Japonica) N. B.

Large heavy glossy green foliage, white flowers in June. Followed by blue berries in winter. Vigorous and fast grower. Used for heavy plantings, screens, windbreaks, etc. Also may be kept sheared to any size hedge. Stands alkaline soils and holds a good rich color. Plant from 18" to 4 ft. apart for hedges and windbreaks.

	Dozen	Per 100
Seedlings, 1 year	\$1.00	\$ 6.00
18 to 24 inches high	2.00	12.00
2 to 3 feet high	3.50	20.00
3 to 4 feet high	5.00	30.00

For heavier B&B plants, see page 10.

CALIFORNIA PRIVET (Ligustrum Ovafolium) N. B.

Same grades and prices as Amoor River Privet.

BIRD OF PARADISE (Poinciana Gilliessi) N. B.

For description, see flowering shrubs on page 22.

	Dozen	Per 100
2 to 3 feet high-----	\$3.00	\$20.00
3 to 4 feet high-----	4.00	30.00

COMPACT AND PYRAMIDAL ARBORVITAE, page 14.

CHINESE SEEDLING ARBORVITAE on page 15.

ORNAMENTAL DEPARTMENT ROSES

We list here the choicest varieties known today. All of our plants are field grown and hardy. These plants have all bloomed the past summer and will bloom the first spring after planting. All are ever-blooming. They are the best of the tea roses and everblooming hybrids.

HOW TO PLANT

Always plant bushes deeper than they stood in the nursery row and cut off tops within six inches of the ground after planting. After watering well, mound up around plants with loose dirt. Roses are surer to grow if planted this way in December, January, February, and will grow off faster than roses planted later. Our roses are grafted on hardy root stocks, especially adapted to black or heavy soils, which makes them superior to roses budded onto certain other root stocks.

PRICES, except noted otherwise:

	Each	Dozen
Medium 2-year plants-----	\$0.50	\$5.00
Best 2-year plants-----	0.75	7.50

EVERBLOOMING RED VARIETIES

ETOILE DE HOLLAND

Deep intense velvet red. Large, handsome in bud and open flower; very hardy, strong grower; a favorite with everyone.

E. G. HILL

Very large, brilliant red handsome blooms; better than the American Beauty, upright grower; ever-blooming.

C. K. DOUGLAS

Very fragrant, long buds. large flowers; is a bright crimson scarlet.

RED RADIANCE

Beautiful, extra large, perfect buds and blooms of a lovely red, borne on long stems; strong and vigorous grower; very resistant to disease; hardy. The best and most popular red rose grown.

F. S. KEY

Rich, deep rose color of immense size; beautiful buds and flowers. A good bloomer; sturdy. One of the best for cut flowers, will last a week after cutting.

ROUGE MALLERIN

Striking and rich color. Nice plant and flower habit. Lovely in bud and bloom; makes a good cut flower.

AMI QUINARD

Long-pointed, blackish garnet bud, opening to a loose, semi-double, cupped, fragrant red bloom so dark as to seem almost black. Vigorous, profuse-blooming plant.

SHADES OF PINK EVERBLOOMING**BETTY UPRICHARD**

Largest size, magnificently formed, deep and double, fragrant, bright rich pink; very hardy plant.

COLUMBIA

Very large buds and perfect open flowers; fragrant, clear, imperial pink; free bloomer.

RADIANCE

A beauty in bud and bloom. Lovely, bright silvery pink; exceedingly vigorous and disease resistant; very hardy; people always admire this rose when visiting our nursery in summer. Best pink rose.

SHADES OF YELLOW EVERBLOOMING**LADY HILLINGDON**

Deep, golden, yellow, large pointed buds; grows and blooms abundantly.

ROSLYN

Bright golden-yellow, large buds. Rich color. Brilliant in effect.

WHITE EVERBLOOMERS**KANSERIN AUGUSTA VICTORIA**

Creamy white, exquisite flowers; strong, upright grower.

CALEDONIA

Excellent rose with a good plant under it. Does not disappoint.

BLENDED COLORS**TALISMAN**

A rich blending of orange, red, copper and gold. The finest rose grown for beauty, daintiness and loveliness.

PRESIDENT HERBERT HOOVER

Blending of orange, red, and gold. Large, open free-flowering plant which produces blooms throughout the season.

CLIMBING ROSES**CLIMBING PINK RADIANCE**

A perfect rose and a vigorous grower.

CLIMBING AMERICAN BEAUTY

Colors, rich red, passing to crimson; heavy strong grower; hardy.

CLIMBING PAUL SCARLET

Truly a scarlet beauty. Robust grower. Excellent bloomer.

CLIMBING K. A. V.

Creamy white. Perfect open flower. Strong grower and free bloomer.

CLIMBING TALISMAN

Stunning colors; vigorous growth.

DWARF OR POLYANTHA OR BABY ROSES

CECILE BRUNNER

The sweet heart rose. Soft, delicate pink, perfect shaped buds and open flowers.

GLORIA MUNDI AND GOLDEN SALMON

Small double flowers in clusters. Color dazzling orange-scarlet. Constant bloomer which will be a bright spot in your garden.

IDEAL

Compact dwarf grower, rich garnet-red clusters of flowers. A constant bloomer and a favorite.

KATHERINE ZEIMIT

Bud and flower small, pure white; borne in clusters. Continuous bloomer.

FLOWERING DECIDUOUS SHRUBS

We recommend planting principally in groups or masses and for hedges or screens, planting against buildings, along fences and drives, and in every nook and corner. You should also include some of the EVERGREEN class. Crepe myrtle, althea and other summer blooming shrubs will bloom prettier and grow more symmetrically if severely pruned during the winter season.

PRICES:

	Each	Dozen
Medium size, 2-year	\$.50	\$ 5.00
Extra large, 3-year	0.75	7.50
Larger specimens	1.00	10.00 and up

ALTHEA

Flowers like roses, bloom all summer, shrub or tree; hardy; colors, red, lavender, pink and white.

BRIDAL WREATH (spirea Van Houtte)

The prettiest of all spring bloomers; snowy white, very graceful and hardy.

DOUBLE BRIDAL WREATH (s. Reevisiana Fl. Pl.)

Same as above except double flowers.

BIRD OF PARADISE

Upright, spreading shrub, fernlike foliage, large clusters pea-shaped, yellow flowers with long brilliant red stamens. Very hardy. Deciduous. Used extensively for roadside planting by the Texas Highway Department.

BUSH HONEYSUCKLE

Fragrant flowers followed by showy berries. Not a climber. White and pink colors.

CREPE MYRTLE

Very beautiful shrub; profuse and continuous bloomer; grows anywhere; very hardy. Colors, red, lilac, pink, and white.

DEUTZIA

Flowers double, pure white, tinted with blush, strong, upright; blooms early.

FLOWERING PEACH

Very large, dark red double flowers early in spring.

FLOWERING CRAB APPLE

Pink, red, and shell-pink flowers.

GOLDEN BELL (forsythia)

Golden yellow; blooms early.

LILAC

Sweet scented, delicately colored flowers. Well known shrub; very hardy.

MOCK ORANGE

Free blooming, white flowers early in summer.

PURPLE LEAF PLUM (prunus pissardi)

Very graceful. Small tree with purplish red leaves.

SALT CEDAR (Tamarix Africana)

Tall growing shrubs with feathery, cedar-like foliage. Delicate, bright carmine flowers in long racemes during summer. Adapted to all soils and climatic conditions in Texas. Used extensively by the Texas Highway Department for roadside plantings.

WEIGELINS

Rose pink flowers in great profusion.

WILLOW, DESERT or FLOWERING (Shilopsis Linearis)

Large shrub or small tree. Bears trumpet-shaped flowers during the summer. Well adapted to arid sections and light soils. Also used by the Highway Department.

VITEX

Flowers small, pale lilac in slender, paniced erect racemes; foliage assumes autumn tints. Very hardy.

BUTTERFLY BUSH (buddleia intermedial)

See page 5.

EVERLASTING SWEETPEA (lathyrus latiolia)

See page 13.

FLOWERING DOGWOOD (cornus floridus)

Well known, beautiful, white flowering shrub.

3 to 4 feet high, each ----- \$2.00

4 to 5 feet high, each ----- 3.00

HUISACHES (Acacia Farnesiana)

Native tree of Southwest Texas. Similar to Mosquito except it is evergreen and has attractive yellow flowers in May.

Gallon cans, each ----- \$1.50

Larger sizes, each ----- 2.50

PLUMBAGO LARPENTA (Leadeorth) B&B

Deep blue flowers all summer. Low trailing habit. Extremely showy.

Plants in gallon cans, each ----- \$1.00

ANGEL LILIES

Large blooms, veined red.

Bulbs, per dozen ----- \$2.00

CANNAS

Green or bronze foliage; flowers all colors.

Bulbs, per dozen ----- \$1.00

TUBEROSE

Bulbs, per dozen ----- \$0.50

PECANS AND WALNUTS

We grow the very best EGG SHELL varieties for Texas planting. The pecan will grow and bear well on any soil even though it is shallow, if the soil is well enriched and given plenty of water. To do well, the pecan must have its roots in PERPETUAL MOISTURE and its tops in PERPETUAL SUNSHINE. It is best to dynamite the holes if the soil is shallow. Our trees are grafted from bearing trees and come into bearing several years younger than the ordinary grafted trees. Pecans should be planted around every home and farm. For yard planting, large size trees are recommended. On large trees, keep the trunk wrapped with paper and burlap the first summer. Soak ground thoroughly once a week and cultivate well.

PRICES:	Each	Dozen
Not branched, 3 to 4 feet.....	\$1.50	\$15.00
Not branched, 4 to 5 feet.....	2.00	20.00
Not branched, 5 to 6 feet.....	3.00	
Not branched, 6 to 8 feet.....	4.00	

Larger trees priced according to value, approximately \$1.00 per inch in circumference at ground level.

Have limited number of trees up to 4-inch caliper.

EASTERN VARIETIES

STUART:

Best known of the standard varieties. Large nuts; tree sturdy, upright habit; fast grower, good shade tree and very prolific.

SUCCESS:

Lare nuts, recommended highly; not subject to Rosette or Die Black. Fine for yard planting. Wide spreading tree.

SCHLEY:

Medium large, long nut, thin shell, crack easily. Fine flavor; luxuriant foliage and rapid growth. Beautiful tree.

DELMAS:

Large nut, plump and well filled; thin shell; heavy bearer. Tree strong and vigorous.

MAHAN:

Heavy producer of enormous size nuts. Very thin shell. Bears very young. Strong grower. Holds all foliage until frost. A clean yard tree.

WESTERN VARIETIES

BURKETT:

Medium size, short, round nut. Fills well, good flavor. Thin shell. Good for West Texas.

WESTERN SCHLEY:

Medium size, long nut, cracks easily, good flavor; a good Texas variety.

THOMAS BLACK WALNUT (*Juglans Nigra*):

One of the largest of the improved varieties and of the best quality. Good cracking quality. The most prolific and abundant bearing tree we grow. We have a tree in the nursery row eighteen months from graft that matured twenty-eight full sized nuts. The tree will thrive and make vigorous growth where the pecan will not grow. Well adapted in every county in Texas to the soils and climatic conditions. Makes a wonderful shade tree.

GRANDE ENGLISH WALNUT—

Must be planted with the Black Walnut to pollenize or crops will be very light.

PECAN AND WALNUT GRAFTING WOOD:

Can supply scions of many varieties at 5¢ each.

SHADE TREES

GROUP 1—

PRICES (Except noted otherwise):

Large, 6 to 8 foot trees, each	\$1.00
Branched, 8 to 10 foot trees, each	2.00
Heavy, 1½- to 2-inch caliper trees, each	3.00
Larger sizes, \$1.50 per inch caliper near ground.	

AMERICAN ELM:

Broadleaved, fast grower and more handsome than native elm; upright form.

NATIVE ELM

A very desirable tree, clean habits, and a good hardy grower. RESISTANT TO ROOT ROT.

BOX ELDER (*acer negundo*):

Very fast grower; beautiful tree making a dense shade.

COTTONWOOD:

Rapid growth on rich land; well known.

POPLAR (*Lombardy*):

Graceful, tall, slender; fine effect.

RUSSIAN MULBERRY:

Best for quick shade.

CHINESE ELM:

Introduced by the Department of Agriculture. One of the fastest and best growing shade trees.

SYCAMORE (*Platanus Glabrata*):

Tall upright, vigorous grower. Very symmetrical and beautiful. Usually has a strong leader up through center of tree and branches well from this strong body. One of the largest, long-lived shade trees in North America. The variety we grow is a NATIVE of Southwest Texas. It will stand alkaline soils, and is RESISTANT to the TEXAS COTTON ROOT ROT. This makes it one of the most desirable and valuable shade trees.

GROUP 2—

PRICES, except noted otherwise:

6 to 8 foot trees, each	-----\$2.00
8 to 10 foot trees, each	----- 3.00
Larger size trees, each, per inch caliper	----- 2.00

ARIZONA ASH:

Medium growth; thrives in any soil.

UMBRELLA CHINA

Well known tree. Cut off half of the new growth each year and the wind will not break them.

NON-BEARING MULBERRY

Makes a quick shade; long lived.

GROUP 3—**LIGUSTRUM AND NATIVE RIVER CYPRESS TREES: PRICES**

6 foot trees, each	-----\$2.00
8 foot trees, each	----- 3.00
Larger trees, each	----- \$4.00 and up

LIGUSTRUM TREES (Ligustrum Japonica) B&B

An ornamental, evergreen shade tree. Dark green, heavy foliage. White flowers followed in June by blue berries in winter. Medium size tree, very dense shade. Very attractive. Used extensively on lawns and along drives or as street trees.

NATIVE RIVER CYPRESS

Tall, fast growing tree, small, fern-like leaves, attractive autumn color, very graceful.

LIVE OAK TREES (Quercus Virginiana) B&B

We have the Central Texas type, which is a much faster grower than the native West Texas Live Oak.

SPANISH OAK

Native of Southwest Texas. Beautiful Autumn colors.

PRICES OAK TREES:

5 to 6 foot trees, each	-----\$3.50
6 to 8 foot trees, each	----- 5.00
Larger sizes, each	----- \$7.50 and up

RED BUD—See page 24.**WEeping WILLOW (Pendula)**

Well known tree, very graceful, fast grower.

5 to 6 foot, NB, each	-----\$1.00
6 to 8 foot, each	----- 2.00
8 to 10 foot, each	----- 3.00
Larger sizes, each	----- \$4.00 and up

MAGNOLIA GRANDIFLORA—See Page 11.**PECAN TREES—See Pages 25 and 26.****THOMAS BLACK WALNUT—See Page 26.**

FRUIT DEPARTMENT

PEACHES

We grow and test hundreds of varieties and offer you only the best bearing varieties in this list.

For the country from San Antonio south, while other varieties are also profitable, we recommend especially the Pallas, Best May, Babcock, and Luttichau, as these are the surest and best bearers.

From San Antonio north, the above are not to be recommended except Pallas and Best May.

High locations are preferable to bottom lands for peaches. Do not plant trees too close together in the orchard. The mid-season and later varieties are best for canning and preserving.

PRICES:

	<i>Each</i>	<i>Dozen</i>	<i>Per 100</i>
3 to 4 feet high.....	\$0.50	\$5.00	\$40.00
4 to 5 feet high	1.00	10.00	65.00
2-year heavy trees.....	1.50	15.00	100.00
3-year heavy trees.....	2.00	20.00	
Native seedling peach trees at half price.			

MAY RIPENING

BEST MAY

A very promising extra early peach; freestone.

MAYFLOWER

Large, red, semi-cling; best quality; heavy and sure bearer. Vigorous grower.

LUTTICHAU

A new variety in demand south of San Antonio. Early White freestone, touched with red. Same type as Pallas. June 1st.

BABCOCK

Good for home planting and as a market variety. A high quality peach with smooth red cheek and highly-flavored white flesh. Early June.

JUNE RIPENING—In Order of Ripening

MAMIE ROSS

Large semi-cling, white flesh.

CARMAN

Big handsome, highly flavored, free. Late bloomer, heavy bearer, vigorous tree.

PALLAS

Sweet as the Honey but larger and later ripening. Also a later bloomer, Bears well here and prolific farther south. One of the very best market peaches for the South Texas planter.

HALEHAVEN

Freestone, ripens early July. Large, beautifully colored. yellow-fleshed peach.

LEONA

Well known, yellow freestone.

JULY RIPENING

J. H. HALE

Highly recommended by originator; extra large, yellow, freestone.

EARLY ELBERTA

Ripens 10 days earlier than the Elberta

ELBERTA

Most popular peach grown for eating, canning, and shipping; large, yellow, freestone. Tree vigorous grower.

FRANK CLING

Like Elberta, but a highly flavored cling. Will produce five bushels to one Elberta. Ripens a few days later. The surest and most abundant peach we know.

JUBILEE

Of Elberta type and an excellent freestone, yellow variety which is sweet, tender, and juicy.

HOBSON CLING

Best white cling for sweet pickles and preserves. Sure and a heavy bearer. Last of July.

AUGUST RIPENING**CARPENTER**

A fine, rich, juicy, red cling, very prolific and of the best quality. Sure bearer.

FRANKIE FREESTONE

Ripens August 15. A large peach with all the qualities of the Frank. Heavy producer. Good shipper. Rich yellow with bright red cheeks.

KATY

Highly colored, yellow, very attractive, large and prolific, good flavor. Freestone.

LATE ELBERTA

Large yellow, freestone, finest flavor, firm, good shipper. Sure bearer and very productive. Tree vigorous grower.

BARBARA

Large, fine flavored, yellow peach, sure bearer and very productive. Fine for market and home use. Firm meated. Vigorous tree.

PLUMS

No finer fruit for preserves, jams and jellies and no tree will grow faster and bear younger. The Bruce, Burbank, and Wickson are very profitable market plums for south of San Antonio. For sandy soils we grow these on plum roots especially adapted to deep sand.

PRICES:

Same grades and prices as Peaches.

VARIETIES IN ORDER OF RIPENING**METHLEY**

Introduced by the U. S. Department of Agriculture from South Africa. Large, greenish-red, with brilliant red flesh, finely flavored. One of the best for the South. Ripens in May.

BRUCE

Large, red early plum; productive and a good seller. Tree vigorous and hardy.

SANTA ROSA

Large, deep rich purple when ripe; firm, good shipper; tree fast, upright grower.

SATSUMA

Blood red flesh, large, firm. July 1st.

BURBANK

Large, firm, red with yellow meat; youngest and heaviest bearer; not subject to any worms; tree a good grower. Weeping habit. Our surest plum.

WICKSON

Largest size; yellow meat, firm, rich flavor; upright grower. Japanese variety. July 15th.

CHERRIES**PRICES:**

Same grades and prices as plums.

SAPA

Fine size; late bloomer; prolific. Dwarf grower.

PEARS

The pear is one of the surest and most productive of fruit trees, as the blooms will endure the heavy frosts. They require deeper soil than peaches and plums and low wet places are more suitable. They grow to be very large and are long lived trees. The LeConte, Douglas, Garber, and Kieffer are very profitable for market.

PRICES:

Same grades and prices as peaches.

VARIETIES**LECONTE**

Medium size, bell shape, mellow and sweet; bears young, very prolific. August 1st.

GARBER

Very large, juicy, some acid; excellent for eating; tree tall, robust. September 1.

KIEFFER

Large size, very hardy and prolific; best for the market and preserves; picked in October. They get mellow and juicy; fine flavor; tree bears young; hardy and blight-proof. September and October.

DOUGLAS

Medium size; fine quality; very young and abundant bearer; late bloomer; resistant to blight; a very promising new variety; for the Southwest.

APPLES

Apples bloom very late and seldom are killed by frost. Some varieties are very heavy bearers, especially the Bledsoe and King David, where conditions are favorable in the country to the north and west of San Antonio. They need deep soil and good cultivation and irrigation. If you live in the "Hill Country" and have sub-irrigated or irrigated lands, these later, as well as the summer varieties, will do well. We know trees in Kendall, Gillespie, Bandera, Kerr and other counties that are very old and are still heavy bearers.

PRICES:

Same grades and prices as peaches.

VARIETIES IN ORDER OF RIPENING**BLEDSON**

Our youngest, best, and heaviest yielder; very large; of fine quality; tree vigorous. We have a 10-year old tree in our nursery from which we gathered 12 bushels of choice fruit.

KING DAVID

Medium size, dull red; best variety to the south; bears very young. This and the Bledsoe should be in every home orchard.

RED DELICIOUS

Well known variety and has proven to be successful here.

DOUBLE RED DELICIOUS

The Double Red Delicious is just like the Delicious, except it has more red.

GOLDEN DELICIOUS

Same as Delicious except color.

TRANSCENDENT

Crab apple; round, yellow shaded with red; early and abundant bearer; fast grower; nothing better for pies, jellies, and apple butter.

APRICOTS

The yard is the best place for apricots. They make pretty trees and bear better if not cultivated. Trees are fast growers. Ripen in June.

PRICES:

Same grades and prices as peaches.

VARIETIES**ROYAL**

Has borne well.

CLUSTER

Grows well; bears young; late bloomer.

KERR

Large good quality; robust tree.

FIGS

Figs grow and bear well if the soil is rich and there is plenty of moisture. Drought often causes the fruit to drop off. Plant on the north side of buildings.

PRICES:

	<i>Each</i>	<i>Dozen</i>
Best 1-year	\$0.50	\$5.00
Larger	0.75	7.50

MAGNOLIA

Very large, rich straw color; the most profitable variety for the southern part of Texas.

BROWN TURKEY

Large, very sweet; nearly everbearing. Bears very young; will bear the first summer after planting. Very hardy and robust.

PERSIMMONS

The persimmon does well on heavy or sandy land with off at 18 to 24 inches and the soil mounded up a foot or more about the trees.

PRICES:

Medium, 2-year, 3 to 4 feet, each	\$1.00
Largest, 2-year, 4 to 5 feet, each	1.50

JAPAN VARIETIES**EUREKA**

One of the most prolific, large varieties.

TANI NASHI

Large, almost seedless. Yellow, cone shaped.

TRIUMPH

Bright yellow; tomato shape, medium size.

GRAPES

Grapes are native to our climate and many varieties succeed well. Grapes bloom very late and often bear full crops when other fruits are scarce. Sandy or soil underlaid with clay are best. The Black Spanish and Herbemont will grow almost anywhere.

PRICES:

Strong, 1-year plants	-----	\$0.50	\$5.00
Strong, 2-year plants	-----	0.75	7.50

Each Dozen

VARIETIES

R. W. MUNSON

Black, very sweet, large berry and bunch; best for arbors and fruit. Ripens July 1st.

CARMAN

Black, medium berry, large bunch; very reliable and productive; good grower and hardy.

RONALDO

Long large cluster, white berries; fine for table and market; strong grower.

EDNA

Large cluster of white berries of best quality; the finest white grape we offer. Good grower.

BLACK SPANISH

A wine grape but good for juice and jellies; grows anywhere; arbor grape.

HERBEMONT

Like Black Spanish, but red juice and small sweet berries; fine for arbors. Ripens in August.

BLACKBERRIES AND DEWBERRIES

Berries are native to our soil and with good cultivation will succeed even without irrigation. Sandy or clay soils are the best. We plant close together in rows wide apart. They come in early when fruit is most relished.

PRICES, Except noted otherwise:	Doz.	100
Strong, well-rooted plants	-----	\$1.00
		\$5.00

VARIETIES

HAUPTBERRY

Medium size berry. Blackberry and dewberry cross; most vigorous grower of all.

TEXAS WONDER & McDONALD BLACKBERRY

Extra good; ripens after dewberry.

BOYSENBERRY

Cross between blackberry, raspberry, and loganberry. Fruit extra large, of excellent flavor, more like raspberry. Strong growing plants.

	Dozen	Per 100
Strong, well-rooted plants	-----	\$2.00
		\$10.00

Strawberries require plenty of water and care. Plant in rows about one foot apart for garden culture. Best to plant these in the fall.

PRICES:	25 plants	100 plants
Strong, well-rooted plants	-----\$0.50	\$1.50

An early variety used extensively for market in the south.

SAINT AUGUSTINE GRASS—SOD (*Stenotaphrum*
Secundatum)

This is the true Carpet grass that will grow under trees in dense shade. Makes a beautiful lawn. We offer this is SOD ONLY. This grass does not mature and must be propagated from seed. The Carpet grass seed offered by seed houses is not the true Saint Augustine. Sod cut in solid blocks one foot square.

Per square yard -----\$1.50
For larger quantities, ask for quotations.

Note: We grow our own San Augustine sod here in our ourseries.

We handle standard brands of chemicals for spraying purposes and a complete line of fertilizers and plant foods. We will mix plant foods which are especially adapted to your soil conditions and the plants to be fed, if you so desire. Usually we get better results from a mixture made to order than from commercial mixtures.

We handle the complete line of Destruxol Products, manufactured by the Destruxol Corporation, Ltd., Pasadena, California.

All chemicals and fertilizers at customary prices.
